

ACHINTYA NARULA

achintyanarula@gmail.com | github.com/Achintya-Narula | linkedin.com/in/achintyanarula | Portfolio
SOFTWARE ENGINEERING | BACKEND DEVELOPMENT | JAVA | TYPESCRIPT | NODE.JS

PROFILE

Final-year B.Tech CSE student with an AI & ML minor targeting software engineering and backend roles. Builds tested REST APIs and web applications using Java, TypeScript/JavaScript, and Node.js, with hands-on work in authentication, authorization, concurrency, validation, CI, and automated testing.

EDUCATION

Shaheed Bhagat Singh State University

Expected May 2027

B.Tech, Computer Science and Engineering | Minor: Artificial Intelligence & Machine Learning

CGPA: 7.53/10 | Relevant Coursework: Data Structures, OOP, Algorithms, DBMS, Operating Systems, Software Engineering

TECHNICAL SKILLS

Languages: Java 17, TypeScript/JavaScript, Python, SQL, C++, C

Backend & Web: Node.js, REST APIs, HTTP/JSON, JWT, JDK HttpServer, HTML/CSS, React; Express and MongoDB exposure

Software Engineering: OOP, API design, authentication/authorization, validation, concurrency, error handling, automated testing

Tools & Delivery: Git, GitHub, GitHub Actions, Postman, Docker, CI workflows

SELECTED PROJECTS

Placement Tracker | TypeScript, Node.js, REST APIs, HTML, CSS

Sep 2026

- Built an authenticated application-tracking REST API and responsive dashboard with CRUD, search/status filters, deadlines, follow-ups, and per-stage dates.
- Implemented salted script password hashes, expiring HS256 JWTs, owner-scoped authorization, atomic file persistence, and 19 automated tests covering core workflows.

CampusQueue | Java 17, JDK HttpServer, Concurrency

Sep 2026

- Developed a workshop-registration REST API with role validation, duplicate prevention, FIFO waitlisting, automatic promotion after cancellation, and structured JSON errors.
- Protected capacity and queue updates with a fair per-workshop ReentrantLock; 25-test suite covers 20 registrations across 8 threads plus real HTTP flows.

Claude GenAI Lab Assistant | Next.js, TypeScript, Server-side APIs

Sep 2026

- Built a Next.js/TypeScript learning application with a server-side API route, local-context loading, request validation, and safe upstream error handling.
- Separated UI, validation, context loading, prompt construction, and external API adapter layers; 22 automated tests plus CI type-checking and production build.

EXPERIENCE

Full-Stack Development Intern | Solitaire Infosys

Jul 2025 - Aug 2025

- Built and integrated web-development features using React, Node.js, Express, and MongoDB in a collaborative full-stack internship environment.
- Worked across frontend/backend integration, REST-style request flows, testing, and Git-based collaboration; received the Best Intern Award.

Web Development Intern | ShadowFox

May 2025 - Jun 2025

- Completed web-development tasks spanning frontend/backend integration, API integration, testing, and Git-based version control.
- Worked with REST/JSON request-response flows and iterative debugging to validate integrations across assigned web-development tasks.

LEADERSHIP

Technical Head | Google Developer Groups On Campus, SBSSU

Aug 2025 - Present

- Coordinate developer workshops, hackathons, GenAI labs, participant setup, technical support, and volunteer execution with the student core team.
- Provide hands-on setup, debugging, and tool support during technical sessions and GenAI labs, helping students resolve environment and workflow issues.

STPO Team Member | Shaheed Bhagat Singh State University

- Support placement-related student communication, coordination, and administrative follow-ups alongside the university placement team.
