SOFTWARE ENGINEERING | BACKEND DEVELOPMENT | JAVA | TYPESCRIPT

PROFILE

Final-year B.Tech CSE student with an AI & ML minor and project experience in Java 17, Spring Boot, PostgreSQL, TypeScript, Node.js, and Python. Built REST APIs with JWT authentication, transactional enrollment, automated tests, and Docker/CI workflows. Seeking software engineering and backend internships from January 2027.

EDUCATION

Shaheed Bhagat Singh State University **Expected May 2027**

B.Tech, Computer Science and Engineering | Minor: Artificial Intelligence & Machine Learning

CGPA: 7.53/10 | Relevant Coursework: Data Structures, OOP, Algorithms, DBMS, Operating Systems, Software Engineering

TECHNICAL SKILLS

Languages: Java 17, TypeScript/JavaScript, Python, C++, C, SQL
Backend & Web: Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, Node.js, REST APIs, JWT, FastAPI, HTML/CSS; React, Express, MongoDB exposure
Engineering: Git, GitHub, GitHub Actions, Maven, Docker, Flyway, Testcontainers, JUnit 5, OpenAPI/Swagger, Postman, VS Code, automated testing, concurrency
AI & Data: pandas, scikit-learn, XGBoost, Anthropic SDK/API, prompt engineering, context-grounded GenAI workflows

SELECTED PROJECTS

Placement Tracker | TypeScript, Node.js, REST APIs, HTML, CSS

• Built an authenticated application-tracking REST API and responsive dashboard with CRUD, search/status filters, deadlines, follow-ups, and per-stage dates.
• Implemented salted scrypt password hashes, expiring HS256 JWTs, owner-scoped authorization, atomic JSON persistence, and idempotent reminders; passed 22 tests covering API, workflow, storage, and UI helpers.

CampusQueue | Java 17, Spring Boot, PostgreSQL, Spring Security, Docker

• Built a Spring Boot workshop API with JWT/BCrypt authentication, organizer ownership checks, search/pagination, FIFO waitlisting, and automatic seat promotion after cancellation.
• Serialized enrollment through PostgreSQL row locks and transactions; 28 integration tests include 20 students across 8 threads producing exactly 3 confirmed seats and 17 waitlisted. Added Docker Compose and CI.

Claude GenAI Lab Assistant | Next.js, TypeScript, Anthropic SDK

• Built four learning modes grounded in local lab notes, with server-side API keys, input validation, and safe errors; 22 mocked-adapter tests, type-checking, and a production build run in CI.

Customer Churn Prediction & Explainability | Python, FastAPI, Docker, XGBoost

• Packaged a preprocessing/XGBoost pipeline as a Python/FastAPI service with Joblib, Docker, and pytest CI; achieved 0.8486 ROC-AUC on a 1,761-row holdout from IBM's public Telco sample.

EXPERIENCE

Full-Stack Development Intern | Solitaire Infosys **Jul 2025 - Aug 2025**

• Built and integrated web-development features using React, Node.js, Express, and MongoDB in a collaborative internship environment; received the Best Intern Award.

Web Development Intern | ShadowFox **May 2025 - Jun 2025**

• Completed web-development tasks involving frontend/backend integration, REST-style API workflows, testing, and Git-based version control.

LEADERSHIP

Technical Head | Google Developer Groups On Campus, SBSSU **Aug 2025 - Present**

• Coordinate developer workshops, hackathons, GenAI labs, participant setup, technical support, and volunteer execution with the student core team.
